While 80 – 90% of all student/athletes recover in approximately 3 to 4 weeks, 10 – 20% present with lingering symptoms that require a customized and individualized plan of care. This webinar will cover the REAP protocol for standard concussion management as well as theories and potential solutions to treating the complex concussed student/athlete.

Karen McAvoy is dually credentialed as a Licensed Clinical Psychologist and a School Psychologist in Colorado. She was the School Psychologist at the high school attended by Jake Snakenberg when he passed away from “Second Impact Syndrome” in 2004. As a result, Karen developed the multi-disciplinary team approach to community-based concussion management known as REAP (Reduce/Educate/Accommodate and Pace).

**Please note that there is NO charge for this webinar, and CME credit will not be offered.*

**Friday,
October 25,
2013**
